

## MY ENGINE

My engine´s very strong, she´s made of steel.  
My engine´s not so long, she has four wheels.  
She´ll climb the highest mountain to the top.  
But when she´s feeling grumpy she just comes to stop!

My engine whistles as she drives along.  
And when she whistles nothing can go wrong.  
She whistles here and there and everywhere.  
She even whistles to herself when no-one else is there!

One day my engine will give birth to a child,  
And when that child grows up it will be just as strong and wild!

My engine doesn´t only drive on rails.  
And when she comes to water, well, she sails!  
And if need be she´ll just take off and fly.  
Yes, you can sometimes see her high up in the sky!
